SUMMARY

Passionate Full Stack Web Developer with hands-on experience building dynamic, full-featured web applications using the MERN stack. Proficient in React.js, Node.js, Express.js, MongoDB, and TypeScript, with a strong focus on frontend logic, backend APIs, and real-time data handling. Adept at crafting scalable solutions, managing complex state with Redux, and implementing secure authentication flows. Experienced in deploying projects on platforms like Vercel and Render, and integrating third-party services including payment gateways. Eager to solve real-world problems through clean code, modern tools, and consistent learning.

WORK EXPERIENCE

Freelance Full Stack Developer

Remote | Jan 2023 - May 2023

- Led the development of modern, high-performance single-page applications (SPA) using React.js, and Node.js.
- Architected RESTful APIs and microservices using Express.js and Node.js for scalable backend solutions.
- Optimized application performance, reducing load times by 30% using code-splitting, lazy loading, and caching mechanisms.
- Implemented authentication and security measures using JWT, OAuth.
- Collaborated with clients and peers through GitHub, handled deployment pipelines, and ensured cross-platform compatibility and responsive design.

Freelance Full Stack Developer | SaaS Product (Software as a Service)

May 2024 – Oct 2024

- It uses EJS (Embedded Javascript Templates) for rendering dynamic HTML which means it's a server-side rendered (SSR) web app rather than a full frontend framework like React.
- SCSS and CSS are used for UI design , making the application visually appealing.
- SaaS-Product project is a full-stack , server-rendered web application with authentication, dynamic dashboard views, and file management .

PROJECTS

Food Delivery Web Application

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Built a responsive e-commerce platform with user authentication & role-based access.
- Dual-domain architecture (admin/customer) with cloud deployment, API integration, and state management.

E-Commerce Web Application

Tech Stack: TypeScript, MySQL , Node.js, React.js , PostgreSQL

- Full-stack Application with TypeScript for a robust e-commerce platform.
- Utilizes Redux for efficient state management and dynamic product listing.
- A project offering user authentication ,order management.
